OBJECTIVE

Python developer with 5 years of experience in machine learning, data analysis, and SQL. Experience with NLP is a plus. Seeking a Python developer role that leverages machine learning, data analysis, SQL, and NLP skills to deliver intelligent solutions.

EDUCATION

B.Tech in Computer Science and Engineering

ABC Institute of Technology, Pune · 2019

CGPA: 8.7 / 10

TECHNICAL SKILLS

Programming Languages : Python, Java, SQL, C++

Machine Learning : machine learning, deep learning, NLP, natural language processing

Data and Analytics : data analysis, pandas, numpy, matplotlib

Frameworks : TensorFlow, Django, Flask, scikit-learn

Databases : SQL, MySQL, PostgreSQL, MongoDB

Tools : Git, Docker, Jupyter Notebook

WORK EXPERIENCE

Senior Python Developer · DataSolve Pvt. Ltd., Pune (2021 · Present)

3 years of experience as Python developer focusing on machine learning and data analysis.

- Built machine learning models for customer churn prediction using Python and scikit-learn.
- Developed NLP pipelines for text classification and sentiment analysis, experience with NLP includes spaCy, NLTK, and transformer models for natural language processing.
- Performed data analysis on large SQL databases using pandas and numpy.
- Deployed machine learning APIs using Django and Flask on cloud infrastructure.
- Wrote complex SQL queries and stored procedures for data extraction and reporting.
- Python developer responsible for end-to-end machine learning pipeline development.
- Used data analysis techniques to identify trends and improve business KPIs.

Python Developer · IntelliData Solutions, Pune (2019 · 2021)

2 years of experience as Python developer in machine learning and data analysis projects.

- Developed Python scripts for automated data analysis and SQL-backed ETL pipelines.
- Built NLP models for information extraction; experience with NLP tools including spaCy.
- Used TensorFlow for deep learning and machine learning model training.
- Maintained SQL databases and optimised slow queries improving performance by 40%.
- Created data analysis dashboards using pandas and matplotlib.
- Python developer working with SQL, machine learning, and NLP on a daily basis.

PROJECTS

1. Resume Screening System (Python, NLP, machine learning, SQL, data analysis)

End-to-end Python application that uses NLP and machine learning to screen resumes.

Python developer built TF-IDF and cosine similarity scoring with SQL database backend.

Tech: Python, NLP, machine learning, pandas, data analysis, SQL, Flask.

2. Sales Forecasting (Python, machine learning, pandas, SQL, data analysis)

Machine learning regression model in Python to forecast monthly sales figures.

Pulled training data from SQL warehouse; used pandas for data analysis.

Python developer used machine learning to reduce forecast error by 22%.
Tech: Python, machine learning, SQL, pandas, TensorFlow, data analysis.

3. Sentiment Analysis API (Python, NLP, Django, machine learning)

Django REST API with real-time NLP sentiment analysis endpoint.
Experience with NLP includes training machine learning classifier on 50,000 samples.
Python developer built complete NLP pipeline with data analysis and SQL logging.
Tech: Python, NLP, machine learning, Django, pandas, data analysis.

CERTIFICATIONS

- Google Professional Machine Learning Engineer
- Python for Data Analysis and NLP · Coursera
- SQL for Data Science · IBM (Coursera)
- TensorFlow Developer Certificate · Google

SUMMARY

Python developer with 5 years of experience in machine learning, data analysis, and SQL.
Experience with NLP is a plus · extensive NLP work across all roles.
Core skills: Python, machine learning, SQL, NLP, data analysis, pandas, TensorFlow, Django, Flask.
Proven Python developer track record delivering machine learning and data analysis solutions using SQL databases and NLP techniques. 5 years of experience total.

LANGUAGES: English (Fluent), Hindi (Native)

LOCATION: Pune, Maharashtra, India
